

Bekzad Dzhanpolatov

Founder | CEO

Role in the project

Bekzad Dzhanpolatov, Founder and CEO of KeyAI, is a strategic leader driving innovative solutions for crypto asset recovery and post-quantum blockchain security. His expertise in cryptography, AI, and strategic planning positions KeyAI as a pioneer in the crypto industry.

Key Strengths:

- Strategic Vision & Blockchain Expertise: Driving KeyAI's mission with deep knowledge of cryptography, AI, and blockchain innovation.
- Project & Team Leadership: Delivering complex projects on time while building high-performing, innovative teams.
- Market Insight & Entrepreneurship: Identifying opportunities in crypto recovery and scaling startups to market success.
- Operational Efficiency: Streamlining processes to enhance productivity and ensure seamless execution of strategies.
- Innovation & Problem-Solving: Developing cutting-edge solutions to tackle industry challenges and drive technological advancements.

Adam Nelson-Archer

Chief Data Scientist

Role in the project

Adam Nelson-Archer is a computer science professional specializing in AI and data analytics, with a 4.0 major GPA at the University of Houston. As a Research Scientist at the DAIS lab, he conducts cutting-edge research in intelligent systems and generative AI, earning a national scholarship for his work. Adam is currently preparing a paper for the prestigious AAAI conference, highlighting his contributions to AI innovation.

Key Achievements and Qualities:

- Research & Innovation: Contributed to a high-fidelity lunar dataset using AI and developed a reinforcement learning optimization model for multi-agent environments.
- Technical Expertise: Proficient in Python, Java, C++, SQL, and tools like MongoDB and Vercel, with certifications in advanced computing, generative AI, and cybersecurity.
- Teaching & Leadership: Experienced Computer Science Instructor with a talent for simplifying complex concepts, and demonstrated leadership through collaborative projects and as an Eagle Scout.

Alen Yeskendirov

Brand Manager & Product designer

Role in the project

As the Brand Manager for KeyAI, ensure the project's vision and values are consistently reflected across all touchpoints, building a cohesive identity that resonates with users. As a Product Designer, Alen focus on crafting seamless, user-centered experiences that blend functionality with aesthetics to deliver solutions people love.

Yuriy Aydarov

Lead Engineer | Cryptography & Blockchain Specialist

Role in the project

Yuriy Aydarov, PhD, is an expert in cryptography, blockchain, and AI, leading KeyAI's innovations in crypto recovery and post-quantum security. A senior lecturer at Perm State University, he has mentored prizewinning teams and founded an online school for mathematics and cryptography.

Key Strengths:

- Cryptography & AI Expertise: Mastery of lattice-based attacks, post-quantum cryptography, and AI-driven nonce guessing for efficient key recovery.
- Blockchain Innovation: Designed the Phoenix Chain, a post-quantum resistant blockchain with integrated recovery mechanisms.
- Academic & Educational Leadership: Senior lecturer, mentor to award-winning teams, and founder of Aydarov School, advancing cryptography and mathematics education.
- Research Excellence: Published groundbreaking work in cryptanalysis and AI applications.

Yan Mitrofanov

Co-Founder | Operations, Marketing & Strategy Expert

Role in KeyAI

- Team and operations management.
- Developing marketing strategies and branding.
- Hypothesis testing and implementing innovations.

Experience

Yan is an experienced entrepreneur and leader in the crypto industry, with extensive expertise in project management, startup development, and innovation. At KeyAI, he oversees operations, marketing, and team management, driving the project's growth and success. He has launched a successful blockchain project integrating NFTs and gaming, managed high-ROI marketing campaigns across platforms like Google Ads and social media, and secured funding for his ventures while investing in promising startups.

Yan is a results-driven professional with exceptional leadership and team management skills, in-depth knowledge of blockchain and tokenomics, and expertise in investment attraction and strategic planning. His ability to seamlessly combine technology and strategy makes him an invaluable member of the KeyAI team.

Experience

With six years of experience in design, Alen excels in UI/UX, branding, and product development, transforming complex ideas into simple, impactful solutions. His programming skills and expertise in crypto technologies bridge the gap between design and emerging innovations. Known for creativity, problem-solving, and a user-first approach, Alen thrives at the intersection of design and technology, creating products that redefine digital possibilities.
